Education

BTU Cottbus-Senftenberg, Germany

Apr 2025 – Present

Master of Science in Artificial Intelligence

Relevant Coursework: Data Warehouse, Causal Data Science, Machine Learning for Distributed Computing

Information Technology University, Pakistan

Sep 2016 – Feb 2021

Bachelor of Science in Computer Science

Skills

Languages & AI: Python (Selenium), C, C++, Java, Bash, LangChain, OpenAI API, RAG, ChromaDB, SQL Agents

Databases: MSSQL, MySQL, PostgreSQL, MongoDB

Data Engineering: Apache Airflow, Data Bricks, ETL, Power BI Dashboards, Distributed Systems (pySpark)

DevOPS: Linux (Debian, Ubuntu, CentOS), Kubernetes, Docker, Git, Ansible, Terraform, CI/CD (GitHub Actions)

Frameworks & Monitoring: Flask, Django, Grafana, Prometheus

Cloud: VMware, AWS, GCP, Azure, IBM, Digital Ocean, Alibaba

Languages: English (C1), German (B1)

Experience

Ericsson

Aug 2022 – Feb 2025

Data Engineer

- Engineered Apache Airflow DAG pipelines and Python scripts for critical data engineering workflows.
- Integrated LangChain SQL Agent with MSSQL to automate natural-language query generation for internal data requests.
- Automated MSSQL workflows with Python/pymssql, optimized heavy T-SQL queries.
- Managed day-to-day VMware/vCenter environments, RAID storage, and ILO servers.
- Set up distributed VMware server infrastructure on HPE machines using Terraform and Ansible.

Project 1: NLP Email-to-SQL LLM Bot [in](#)

Tech Stack: Python, LangChain, OpenAI API, ChromaDB, MSSQL, SMTP

- Mailbot detects incoming customer emails and parses natural-language data requests using an LLM.
- LangChain SQL Agent translates customer requests into optimised MSSQL queries via LLM.
- Delivered query results back to customers automatically as CSV attachments through SMTP.

Project 2: Tech Migration from Ericsson GSC China [in](#)

Tech Stack: Python, Apache Airflow, AWS, MSSQL, Linux, Bash

- Moved infrastructure and workflows from Ericsson GSC China to AWS and internal servers with no downtime.
- Rebuilt the data pipelines in Apache Airflow and Python, cutting manual work by 40%.

Project 3: Delta Scanner | Ericsson/Jazz [in](#)

Tech Stack: Python, pymssql, multiprocessing, XQuery

- Built a real-time monitor using Python multiprocessing to scan 30,000 XML files for config changes.
- Generated daily delta reports for Jazz's network, helping catch config issues early.

HelloApp Pte. Ltd.

Jan 2020 – July 2022

Linux System Administrator & Python Developer

- Looked after infrastructure for 50+ apps across AWS, GCP, Azure, Digital Ocean, Vultr and Linode, kept uptime at 99.9%.
- Set up and managed 50+ websites using WHM/cPanel, Vesta, CloudPanel, and ISPConfig.
- Deployed WordPress and Python apps on cloud infrastructure.

Project 1: APKFuel.com | Android App Platform

Tech Stack: Python (Selenium, BeautifulSoup, Scrapy), WordPress, AWS/GCP/DigitalOcean

- Built APKFuel from scratch, grown to 96,000+ monthly visitors using Python scrapers (Selenium, BeautifulSoup, Scrapy).
- Ran Google AdSense generating ~\$650/month; grew YouTube channel to 49,000+ subscribers; sold on Flippa for \$18,000.
- Sold the site on Flippa for \$18,000 in 2024.

Certifications

Certified Kubernetes Administrator (CKA) 

Containerized Applications on AWS 

Python Data Structures 

Mastering Ansible Automation
