Skills

Programming: Python, Java, C, C++, C#, Bash

Data Engineering: pySpark, Hadoop, Apache Airflow (ETL Pipelines), Power BI Dashboards

Databases: MSSQL, PostgreSQL, MongoDB, Redis/Elasticsearch

OS: Linux, Virtualization (VMWare ESXI, VCenter), Operating Systems (Debian, Ubuntu, CentOS, Red hat)

Platform & IaC: Kubernetes (Helm/Kustomize), Docker, Ansible, Terraform, GitHub Actions

Cloud: AWS, GCP, Azure, IBM, Digital Ocean, Alibaba

Observability & Tools: ELK Stack, Grafana, Prometheus, Jira/Confluence (Agile/Scrum)

Languages: English (C1) & Deutsch (B1 in Progress)

Education

MS Artificial Intelligence

[BTU Cottbus-Senftenberg](#)

04.2025 – Present

Cottbus, Germany

- Specialization in AI/ML Distributed Systems

BS Computer Science

[Information Technology University](#)

Lahore, Pakistan

- Specialization in Computer Science

Experience

Data Engineer

[Ericsson-Worldwide](#)

08.2022 – 02.2025

Lahore, Pakistan

- Engineered data pipeline orchestration by managing Apache Airflow DAGs and specialized Python scripts for critical data engineering workflows.
- Improved XML parsing speed by 90% on jazz OSS files with distributed servers, enhancing data pipeline performance.
- Managed VMware/vCenter environments, RAID storage, and ILO server infrastructure.
- Provisioned distributed VMware server architecture on HPE virtual machines using Terraform and Ansible.
- Developed proactive observability by implementing custom Python automation scripts for infrastructure monitoring (e.g., RAID health, CPU/disk usage).
- Designed and implemented distributed data workflows using Apache Airflow for high-volume operations.
- Created and optimized heavy-load T-SQL queries; administered MSSQL databases.
- Configured and maintained critical network infrastructure (switches, VPN, security), ensuring secure and reliable connectivity for data platform components.

System Administrator & Python Developer

[HelloApp](#)

08.2022 – 02.2025

Remote, Singapore

- Managed multi-cloud infrastructure for 50+ applications across AWS, GCP, Azure, DigitalOcean, Vultr & Linode ensuring 99.9% SLA uptime and high availability.
- Deployed and administered 50+ websites using WHM/cPanel, Vesta, CloudPanel, and ISPConfig, streamlining web hosting operations.
- Deployed scalable WordPress and Python applications, enhancing cloud infrastructure efficiency and performance.

Projects

Tech Migration from Ericsson GSC China |

- Migrated infrastructure and automated workflows from Ericsson GSC China to AWS and internal VPS, ensuring smooth, uninterrupted system operations.
- Re-engineered data pipelines using Apache Airflow and Python, boosting reliability and reducing manual intervention by 40%.

Diversity Audit | Ericsson/Jazz |

- Accelerated data processing time from 12 hours to 1 hour by implementing distributed computing across 4 servers, achieving a 12x performance improvement.
- Designed custom distributed computing framework (Hadoop/PySpark-inspired) to process 30,000 XML files daily for diversity reporting workflows.

Delta Scanner | Ericsson/Jazz |

- Developed real-time monitoring solution using multiprocessing and custom distributed computing to analyze 30,000 XML files for parameter value changes.
- Generated automated delta reports for Jazz Network infrastructure, enabling proactive network configuration management.

APKFuel.com - Cloud-Based APK Downloader |

- Built a cloud-native APK downloader using Python web scraping, Selenium, and PHP.
- Deployed on multiple clouds (GCP, AWS, Azure, DigitalOcean) from 2019 to 2022, utilizing AWS CloudFront and S3 for media storage.
- Integrated S3 storage with CloudFront and WordPress via a custom PHP plugin for seamless media management.

Courses

- Linux Foundation Certified Sysadmin (LFCS)
- Computer Organization & Architecture
- Data Structures and Algorithms
- Data Warehouse
- Operating Systems
- Machine Learning
- Databases (Oracle Cloud)

Certificates/Achievements

- Certified Kubernetes Administrator (CKA) - Linux Foundation | 
- Containerized Applications on AWS – Amazon Web Services | 
- Getting Started with GKE – Google Cloud | 
- Container & Kubernetes Essentials v2 | 
- Ansible for Network Automation | 
- Mastering Ansible Automation – Codio | 
- Python Data Structures | 

Hobbies

- Open-source project contribution / working on side projects
- Self-Study and online Certifications
- Hiking & Vlogging
