Data Engineer and System Administrator who architected production ETL pipelines and cloud infrastructure at Ericsson supporting 74M+ telecom subscribers (2G, 3G, 4G LTE, 5G). Proficient in Python, Apache Airflow, AWS, and enterprise-scale data architecture. Currently pursuing Masters in Artificial Intelligence at BTU Cottbus-Senftenberg.

EXPERIENCE

ERICSSON | Data Engineer

Aug 2022 – Feb 2025

Jazz Network Performance Management Analytics

Aug 2022 – Apr 2024

Tech Stack: Python, Apache Airflow, MSSQL, T-SQL, Power BI, VMware, distributed servers

- Optimized XML parsing of Jazz OSS network files by 90% through distributed server architecture, enabling real-time network analytics for 74M+ users
- Architected end-to-end ETL pipelines in Apache Airflow ingesting OSS data into cell-level, day-level, and hourly aggregation databases for network optimization
- Engineered Power BI dashboards and HTML/CSS reports delivering actionable network performance insights to C-level stakeholders, influencing 3+ strategic optimization decisions
- Managed production VMware/vCenter infrastructure, RAID storage arrays, and HPE server environments supporting 99.5% uptime SLA
- Optimized T-SQL query performance on large-scale network datasets, reducing execution time by 45% through indexing and query plan refinement

Infrastructure Migration from Ericsson GSC China to AWS

Mar 2023 – Feb 2025

Tech Stack: Python, Apache Airflow, AWS, Terraform, Ansible, Linux, MSSQL

- Migrated production infrastructure and 40+ data workflows from Ericsson GSC China to AWS and internal servers with zero downtime
- Re-engineered data pipelines in Apache Airflow and Python, eliminating 40% of manual intervention and reducing processing time from 15 hrs/week to 9 hrs/week
- Provisioned distributed VMware infrastructure on HPE machines using Infrastructure-as-Code (Terraform and Ansible), enabling self-service deployment for 8 teams
- Coordinated cross-functional migration with network ops, database admins, and security teams

HELLOAPP | Linux System Administrator & Python Developer

Jan 2020 – Jul 2022

- Operated multi-cloud infrastructure supporting 50+ production applications across AWS, GCP, Azure, Digital Ocean, Vultr, and Linode; maintained 99.9% uptime SLA
- Engineered configuration management and deployment automation for 50+ websites using WHM/cPanel, Vesta, CloudPanel, and ISPConfig; reduced provisioning time by 60%
- Deployed and maintained WordPress and Python applications on containerized cloud infrastructure with zero critical security incidents across 2+ years
- Designed monitoring and alerting systems achieving under 5-minute MTTR for infrastructure incidents

APK FUEL | Founder & Developer (Python/Cloud)

Mar 2018 – Oct 2024

- Developed a custom Google Play Store APK downloader using Python (Selenium, BeautifulSoup, Scrapy) to extract and deliver app data, integrating the official Google Play Store API from GitHub
- Built and managed a comprehensive app directory with detailed reviews and specifications
- Worked extensively with WordPress, PHP, and Python, implemented AJAX-based API calls and improved SEO Speed through plugin development and theme optimization

SKILLS

Programming Languages: Python, Java, C, C++, Bash/Zsh

Data Engineering: Apache Airflow (ETL/CI-CD), PowerBI, SQL optimization, distributed data processing, real-time analytics

Databases: MSSQL (T-SQL, query optimization), MySQL, PostgreSQL, replication, backup/recovery, performance tuning

Cloud: AWS (EC2, ECS, EKS), GCP, Azure, VMware/vCenter, Kubernetes, Docker, Terraform, Ansible, CI/CD (GitHub Actions)

Monitoring: Prometheus, Grafana, SNMP (SolarWinds)

Operating Systems: Linux (Debian, Ubuntu, CentOS), Windows Server, networking, kernel patching

EDUCATION

M.S. in Artificial Intelligence

Apr 2025 – Present

BTU Cottbus-Senftenberg, Germany

Relevant Coursework: Data Warehouse, Distributed Computing in ML, Logic in Databases

B.S. in Computer Science

Sep 2016 – Feb 2021

Information Technology University, Pakistan

CERTIFICATIONS

- **Certified Kubernetes Administrator (CKA)** | Linux Foundation
- **Containerized Applications on AWS** | Amazon Web Services
- **Linux Foundation Certified System Administrator (LFCS)** | KodeKloud
- **Python Data Structures** | Coursera
- **Mastering Ansible Automation** | Linux Academy

LANGUAES

- **ENGLISH (C1)**
- **GERMAN (B1)**
- **URDU (NATIVE)**
