

Khaleel Ahmad

Werkstudent – Data Engineering · Python · AI/ML

Berlin, Germany

+49 155 63611714 | khaleel.eu@gmail.com | khaleel-git | khaleel-ahmad

Profile

M.S. Artificial Intelligence student at BTU Cottbus-Senftenberg with 3+ years of professional experience in data engineering, Python pipeline development, and cloud infrastructure. Built and operated Airflow-orchestrated ETL pipelines processing 12,000+ files daily at Ericsson. Available for Werkstudent roles (up to 20h/week during semester), bringing production-grade engineering skills rarely found at student level. Strong background in Python, SQL, AWS, and data quality automation.

Education

BTU Cottbus-Senftenberg

Germany

M.S. in Artificial Intelligence — Deep Learning, ML Systems, Distributed Computing

2025 – Present

- Focus areas: deep learning (PyTorch), signal processing, ML model evaluation, distributed systems.
- Currently enrolled full-time; available for Werkstudent position (20h/week during semester).

Information Technology University (ITU)

Pakistan

B.S. in Computer Science

2016 – 2021

Professional Experience

Ericsson

Lahore, Pakistan

Data Engineer

Aug 2022 – Feb 2025

- Designed and operated **Apache Airflow** ETL pipelines ingesting, validating, and processing **12,000+ structured files daily** on AWS (S3, EC2, RDS).
- Built Python-based data quality frameworks and anomaly-detection tools (Delta Scanner, Baseline Comparator) generating structured diagnostic reports.
- Optimized SQL workflows across PostgreSQL and MSSQL, reducing pipeline execution time by **30%**.
- Collaborated in agile teams, maintained technical documentation, and took end-to-end ownership of data systems in production.

Hello App Pvt. Ltd.

Remote

Python Developer & Automation Engineer

Jan 2020 – Jul 2022

- Built automated data ingestion and processing pipelines across **AWS, GCP, and Azure** using Python and REST APIs.
- Developed monitoring pipelines for reliable, high-volume multi-source data ingestion at scale.
- Managed distributed cloud infrastructure for 50+ applications, maintaining **99.9% uptime**.
- Authored technical documentation and runbooks for all data workflows, adopted as team-wide engineering standards.

APKFuel

Remote

Founder & Developer

Mar 2018 – Oct 2024

- Built end-to-end data extraction pipelines (Selenium, BeautifulSoup, Scrapy) for large-scale metadata collection and processing.
- Implemented automated data validation and quality-check workflows throughout the full ingestion pipeline.
- Designed structured storage and multi-dimensional data management system for millions of application records.
- Applied data-driven analytics to scale the platform to **96K monthly active users**.

Technical Skills

Data Engineering	Python (Pandas, NumPy, Xarray) · Apache Airflow · ETL/ELT · Data Quality · SQL
Cloud & Infra	AWS (S3, EC2, RDS) · GCP · Azure · Docker · Linux · Git
Databases	PostgreSQL · MySQL · MSSQL · MongoDB
ML / AI	PyTorch · Scikit-learn · Jupyter · Model Evaluation · CNNs
Scripting & Tools	Bash · REST APIs · Selenium · BeautifulSoup · VS Code

Languages

English	C1 Professional
German	B1 (actively improving)
Urdu	Native
