Profile

M.S. Artificial Intelligence student at BTU Cottbus-Senftenberg with 3+ years of production experience in Python data engineering, big data pipeline architecture, and automated anomaly detection. Active coursework in deep learning (PyTorch), LLM frameworks (Transformers, LangChain), generative AI, and distributed systems. At Ericsson, built and operated large-scale data processing pipelines on AWS serving telecom systems at production scale.

Education

BTU Cottbus-Senftenberg

Germany

M.S. in Artificial Intelligence

2025 – Present

- Focus: Deep Learning, LLMs, Generative AI, Signal Processing, Distributed Systems.
- Active coursework: PyTorch, Transformers, LangChain, RAG, agentic workflows, time series analysis.

Information Technology University (ITU)

Pakistan

B.S. in Computer Science

2016 – 2021

Professional Experience

Ericsson

Lahore, Pakistan

Data Engineer

Aug 2022 – Feb 2025

- Built Apache Airflow big data pipelines on AWS processing **12,000+ structured files daily** with automated anomaly detection.
- Built Python delta-detection tools (Delta Scanner, Baseline Comparator) to surface drift and generate diagnostic reports.
- Maintained AWS infrastructure (S3, EC2, RDS); optimized SQL across PostgreSQL/MSSQL, cutting runtime by **30%**.
- Collaborated in agile cross-functional teams; authored runbooks adopted as team-wide standards.

Hello App Pvt. Ltd.

Remote

Python Developer & Automation Engineer

Jan 2020 – Jul 2022

- Built data ingestion pipelines across AWS, GCP, and Azure using Python and REST APIs.
- Developed monitoring pipelines for reliable, high-volume multi-source data ingestion.
- Managed distributed cloud infrastructure for 50+ applications at **99.9% uptime**.
- Authored technical documentation and runbooks adopted as team-wide engineering standards.

APKFuel

Remote

Founder & Developer

Mar 2018 – Oct 2024

- Built data extraction pipelines (Selenium, BeautifulSoup, Scrapy) with automated validation.
- Designed structured storage and data management system for millions of records.
- Implemented data quality checks and validation across the full ingestion pipeline.
- Applied data-driven analytics to scale the platform to **96K monthly active users**.

Technical Skills

AI / Deep Learning

PyTorch · Transformers · LangChain · Scikit-learn · CNNs · LLMs · RAG

Data Engineering

Python (Pandas, NumPy, Xarray) · Apache Airflow · ETL Pipelines · Anomaly Detection

Cloud & Infra

AWS (S3, EC2, RDS) · GCP · Azure · Docker · Linux · Git

Databases

PostgreSQL · MySQL · MSSQL · MongoDB

Scripting & Tools

Bash · REST APIs · Jupyter · VS Code

Languages

English C1 Professional

German B1 (actively improving)

Urdu Native
