PROFILE

DevOps Engineer with 3+ years of production experience at Ericsson building Kubernetes platforms, CI/CD pipelines, and cloud infrastructure at enterprise scale. Experienced in AWS, Terraform, ArgoCD, Prometheus, and GitOps. Certified Kubernetes Administrator (CKA). Currently enrolled in M.S. Artificial Intelligence at BTU Cottbus-Senftenberg (part-time, 2025 – Present) and available for full-time roles in Berlin.

EXPERIENCE

Ericsson

Lahore, Pakistan

DevOps Engineer

Jul 2023 – Jan 2025

- Deployed AWS EKS clusters for Zain Iraq's 4G/5G KPI reporting serving **74M+ subscribers** with zero-downtime upgrades.
- Wrote Terraform modules for EKS, RDS, S3, ALB, and IAM cutting provisioning from **2 days to 20 minutes**.
- Set up GitHub Actions and ArgoCD for GitOps deployments cutting release cycle time by **60%**.
- Set up Prometheus, Grafana, and ELK with alerting rules reducing incident detection time by **50%**.
- Built Flask microservices with MongoDB for internal reporting resolving **40% slower** API response under load.
- Handled IAM design and Active Directory integration with VPN-based XML ingestion pipelines into AWS S3.
- Onboarded 3 engineers onto Kubernetes and GitOps and wrote internal runbooks still used by the team today.

Ericsson

Lahore, Pakistan

Data Engineer

May 2022 – Jun 2023

- Built Airflow pipelines in Python to process **12,000+ XML files daily** representing Jazz Pakistan network tower KPIs.
- Automated MSSQL workflows with Python and rewrote slow T-SQL queries, cutting overnight batch processing time by **30%**.
- Switched XML parsing from sequential to multiprocessing and sped up throughput by **90%** on the same hardware.
- Managed VMware ESXi 6/7 and vCenter at Jazz data center and handled RAID, VM provisioning, and HPE iLO access.
- Wrote Ansible playbooks using VMware Galaxy modules to automate OS config and software installs across the VM fleet.
- Delivered Delta Scanner, Baseline Comparator, and Cell Comparator tools used daily by the network ops team.
- Worked with Evernex on-site to swap failed HPE drives and PSUs through two hardware failure incidents.

Hello App Pvt. Ltd. (Singapore-based tech startup, remote)

Remote

DevOps Engineer

Jan 2020 – Jul 2022

- Kept **50+ applications** running across AWS, GCP, Azure, and DigitalOcean at **99.9% uptime** over two years.
- Wrote Bash and Python scripts to automate server setup and deployments, cutting provisioning time by **60%**.
- Managed 50+ production websites on WHM/cPanel, CloudPanel, and ISPConfig with SSL, domains, and config.
- Deployed Django, Flask, and WordPress apps across cloud providers with nginx load balancing and CDN.
- Connected REST APIs and third-party services between platforms and kept data flows reliable across vendors.
- Handled Linux server security including firewall rules, patch cycles, and incident response in production.
- Wrote deployment runbooks and onboarding docs used by new team members to get up to speed independently.

APKFuel

Remote

Founder & Developer

Mar 2018 – Oct 2024

- Built and scaled a platform to **96K monthly users** using Python, PHP, JavaScript, and MySQL on AWS and GCP.
- Deployed and managed cloud infrastructure across AWS, GCP, and Azure with CloudFront, S3, and custom automation.
- Built data extraction pipelines using Python (Selenium, BeautifulSoup, Scrapy) processing large-scale metadata daily.
- Implemented REST API integrations, automated data quality checks, and monitoring across 10+ production domains.
- Administered Linux servers end to end handling security, SSL, DNS, and deployment for the full application stack.
- Built Node.js automation and dashboard tooling to monitor platform performance and pipeline health.
- Successfully exited the project for **\$18K** after scaling to a self-sustaining automated operation.

EDUCATION

M.S. Artificial Intelligence (part-time)

BTU Cottbus-Senftenberg, Germany

2025 – Present

B.S. Computer Science

Information Technology University (ITU), Pakistan

2016 – 2021

TECHNICAL SKILLS

Container & Orchestration	Kubernetes • AWS EKS • OpenShift • K3S • Helm • Kustomize • Docker
IaC & Automation	Terraform • Ansible • Crossplane • Bash • Python • Groovy • HCL • Jinja2
CI/CD & GitOps	GitHub Actions • ArgoCD • Flux • Azure DevOps • Jenkins • GitLab CI
Cloud Platforms	AWS (EKS, EC2, S3, RDS, ALB, IAM) • Azure • GCP • DigitalOcean
Observability	Prometheus • Grafana • ELK Stack • Azure Monitor • Alertmanager
Systems & Virtualization	Linux • VMware ESXi/vCenter • HPE iLO • RAID • Networking
Programming	Python • Bash • C/C++ • Java • SQL • Django • Flask
Databases	MSSQL • PostgreSQL • MongoDB • Redis • Oracle

CERTIFICATIONS

- 2024 **Certified Kubernetes Administrator (CKA)**, Linux Foundation
- 2023 **Linux Foundation Certified Sysadmin (LFCS)**, Linux Foundation
- 2023 **Containerized Applications on AWS**, Amazon Web Services
- 2022 **Ansible for Network Automation**, Cisco

PROJECTS

Ericsson github.com/khaleel-git

Tech Migration: Ericsson GSC China to AWS

2023 – 2024

- Moved Zain Iraq KPI reporting from manual laptop workflows to AWS EKS using Terraform, ArgoCD, and GitHub Actions.
- Containerized legacy Python scripts and set up Prometheus and Grafana so the team could operate services independently.

Ericsson

Bare Metal Infrastructure: Jazz Data Center

2022 – 2023

- Set up HPE bare-metal servers with VMware ESXi and vCenter and built SNMP monitoring and Ansible automation for the VM fleet.
- Built KPI tools (Delta Scanner, Baseline Comparator) the network ops team used daily to spot anomalies across 12,000+ towers.
